

# TRAINING

Do you use all the features of our software? Does all your staff know how to work with the software they use in an efficient way?

We created 3 different programs to help our customers to get the most out of the software they have. We organize training sessions in our office and in some countries.

## NO PROBLEMS, ONLY SOLUTIONS.

*"I have a new employee who is going to welcome customers at the cash."*

→ **This person should receive the Discovery program for Point of Sale. He/she will be performing better operationally in no time.**

*"Some of us use your software for a long time already, but we don't use the advanced functionalities."*

→ **Select people who need more skills in certain modules and let them follow our Upgrade program. You will be able to use other functionalities that will improve your business.**

## ADVANTAGES

- 3 programs for different needs: Discovery, Upgrade and Advanced
- Training sessions always satisfy customers
- Our team is always professional and friendly
- It is possible to combine training with a trip to some karting centers to get new ideas for your business
