

VIRTUAL GARAGE

Main functionalities

Job/task management
Planning
Stock control
Cost control
Private go-kart management
Part comparison (which brand costs less per lap, etc)

This go-karts maintenance software has been developed to assist your mechanics in their go-kart maintenance.

You will be able to have a clear overview on your stock, the time spent on every go-kart, which parts are fitted on them, etc. This software also allows you to manage private go-karts with an invoice system.

MORE POSSIBILITIES WITH...

- Timing software for a better communication between the track marshals and the mechanics. It gathers statistics and a history for your go-karts.
- Office for reports and an integration of the costs with your accountancy
- Point of Sale to include private go-kart's invoices with other bills
